About Me

Enthusiastic and dedicated Computer Science student specializing in frontend development, with a solid foundation in HTML, CSS, and JavaScript. Proficient in creating engaging and responsive user interfaces. Actively seeking internship or employment opportunities to contribute my frontend development skills, problem-solving abilities, and passion for creating seamless user experiences to dynamic projects.

Projects

Front-End Development Project: Online Food Ordering System - Meal Mate

As part of a college project, I spearheaded the development of the front-end interface for "Meal Mate," an innovative online food ordering system tailored specifically for college students. The system aimed to revolutionize the way students order and collect food on campus, eliminating the need for them to wait in long queues during busy hours.

Elite Bank - Online Banking System (Built with React)

As a passionate web developer, I spearheaded the development of "Elite Bank," an online banking system crafted using the React framework. This project aimed to provide users with a modern, efficient, and secure banking experience, encompassing a wide array of banking functionalities such as money transfers, loan applications, account management, and user authentication.
